

AVAILABLE SUBSIDY UNDER MIDH FOR DEVELOPMENT OF ENTREPRENEURSHIP

Sl No	Component	Rate of assistance (50% of total cost) Maximum Amount	Cost norms(Rs.in lakh)
A	Integrated Post Harvest Management		
1	Pack house / on farm collection & storage unit (9 m x 6 m)	2.00	4.00
2	Integrated pack house with facilities for conveyer belt, sorting, grading units, washing, drying and weighing (9 m x 18 m)	25.00	50.00
3	Pre-cooling unit	12.50	25.00
4	Cold room (staging) 30 MT capacity	7.50	15.00
5	Cold Storage (Construction, Expansion and Modernization)		
a	Cold Storage (unit type -1)	120.00	240.00
b	Cold Storage (unit type – 2)	250.00	500.00
c	Refer Vans/ Containers	13.00	25.00
6	Primary/mobile/minimal processing unit	13.75 (max. 55 %)	25.00
7	Preservation unit	1.00	2.00
B	Establishment of Marketing Infrastructure		
a	Rural Markets/Apni Mandies/ Direct Market	13.75 (max. 55 %)	25.00
b	Static/ Mobile vending Cart / Platform with Cool chamber	0.15	0.30
C	Food Processing unit	200.00	400.00
D	Mushroom Cultivation		
a.	Spawn Production Unit	6.00(40%)	15.00
b.	Mushroom Production Unit	8.00(40%)	20.00

The state has tropical climate with average rainfall of 2,200 mm., extending over a period of 8 months in a year. Average temperature comes to 10°C in winter and the summer temperature is 35°C. The humidity ranges from 60 to 98%. The soils of these hillocks and tilla land are deep, well drained and acidic in nature (PH ranges from 4.5 to 6.0).

Favourable agro-climate coupled with availability of tilla land in plenty offers immense potentiality for cultivation of various tropical and sub-tropical fruits, nuts, spices and vegetables in Tripura. In fact, orange, pineapple (Queen & Kew), cashewnut and jackfruit, lime/lemon grown in Tripura are already well known for their excellent quality. Since 2018 pineapple and lemon are being exported to different countries. Horticulture development has been considered to be a major activity for economic betterment of farming community as well as employment generation.

The Directorate of Horticulture & Soil Conservation, Tripura with the assistance available under MIDH Scheme and a maximum allocation of fund under State Plan is therefore laid emphasis on various programmes for development of horticulture in the state. In order to improve livelihood opportunity and to bring prosperity. State Govt. is marching ahead with MIDH Scheme for Integrated Development of Horticulture in Tripura. The Mission is based on "End to End Approach" taking into account the entire gamut of horticulture development with all backward and forward linkages in a holistic manner. The Technology Mission strives to address the issues related technology and technological development, demonstration of technologies, production of quality planting materials, organic farming, efficient water management, Post harvest Management, Food Processing plant health etc. in order to attach compact/cluster area based project for production of horticultural crops. In respect of enhancement of productivity of horti. crops, elite planting materials including hybrid seeds are being distributed to the cultivators to increase production & productivity. In addition, cultivators are being trained up on modern scientific technical know-how for cultivation of horti. crops.

Total area under horticulture in the state is 140890.00 ha with a production of 1961683.00 MT fruits, Vegetables and spices.

Strength:-

- Total productions may be increased by increasing productivity.
- More area may be brought under the cultivation of the crop as per demand
- Introduction of high yielding varieties and improved cultivars may also increase the volume of production of raw materials, as per demand of the industry to be fed with.

Opportunities:-

- Jackfruit, Pineapple and lime /lemon are organic by default widening market sizes either in fresh or processed form.
- Marketable surplus increased due to cease in illegal trade with Bangladesh following border-fencing.
- Innovative crops like Dragon fruit and Tropical Apple started growing within the state.
- Good road connectivity with the villages (producing areas).

Possibilities:-

- Setting-up of post harvest infrastructures in the state availing financial assistance under CSS Schemes and State Schemes.
- Increase in export of pineapple, jackfruit and lime/ lemon are possible.
- Setting up of food processing units are good possibilities.
