

TOURISM

OPPORTUNITIES

Tourism Sector is one of the largest source of employment generation in India including Tripura and plays a very significant role in promoting inclusive growth of the less advanced section of the society.

There is enormous scope for setting up of Tourism Infrastructure like resort, hotel, Tea Tourism activities, Golf Tourism, Adventure Tourism, Eco Tourism, Water Tourism, etc. Besides, there are scopes for development of religious tourist circuits, medical tourism etc.

POSSIBILITY

- Tourism in Tripura may be developed nationally and internationally and 'acclaimed' as all season Tourism destination.
- Tripura may be highlighted with its rich culture, heritage. Wildlife, bio-diversity, so as to provide unique experience of unexplored wonderland to the tourists.
- The local communities may be encouraged in management of tourist destinations as well as hosting activities like home stay.
- Special efforts may be taken up to develop international tourist circuit with Bangladesh and NorthEast States.
- Tripura is an ideal place for developing ecotourism activities like jungle safaris, trekking, rock climbing, forest trails, nature walks, angling etc.

Welcome to Tripura

.... Gateway to Unlimited Possibilities

Phone : 0381-242 1021

The local communities may be encouraged in management of tourist destinations as well as hosting activities like home stay.

UNTAPPED POTENTIAL

Natural resources | Connectivity and infrastructure | Untapped Sectors
Skilled Workforce | International Trade opportunities

BACKGROUND

Tripura is primarily known for its agri-products such as bamboo, pineapple, cashew nut and tea. The state is also the largest producer of jackfruit and True Potato Seed (TPS) and the second-largest producer of natural rubber in India. Rubber and tea-based industries form the prime share of the industrial base in the state, while other resource based industries have recently witnessed developments. The state has established rubber, bamboo and food parks to support existing and potential investors. Moreover, Tripura also has five industrial estates, a growth centre and an export promotion industrial park. The currently functional ONGC Tripura Power Project is also India's biggest Clean Development Mechanism (CDM) project, registered with the United Nations Framework Convention for Climate Change (UNFCCC). The infrastructure of the state provides smooth connectivity with rest of the country through airways, railways, roadways and very soon would be connected internationally.

CONNECTIVITY ADVANTAGES

ROAD NETWORK

- NH8 - up-graded into double lane.

- NH208 - is under construction.

- Road density more than double of India's road density.

SEA PORT

- Sabroom is the southern most town of Tripura from where Chittagong port is 75 km.

- 'Maitri Setu' over River Feni connecting Chittagong Port in Bangladesh.

- Riverine connectivity from Daudkandi in Bangladesh to Sonamura in Tripura.

- Included in the list of Indo-Bangla Protocol (IBP) routes in May 2020.

RAIL NETWORK

- Broad Gauge railway; extended upto Sabroom.

- Agartala-Akhaura Raillink

AIR LINK

- Agartala- 2nd busiest airport of NER.

- Major cities connected by direct flight via Kolkata / Guwahati.

- M.B.B. Airport at Agartala being upgraded as International Airport.

BAMBOO

- Raw Agarbatti manufacturing units under NBM.

- Homestead Bamboo strip making unit.

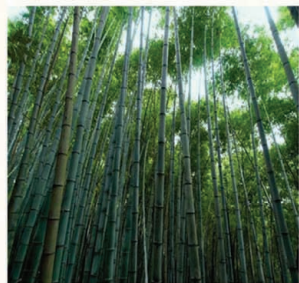

- Homestead Round stick making unit.

- Other units include round stick, briquette, bamboo furniture.

- Opportunity for development of Bamboo Industrial Cluster within Bamboo Park.

- Setting up of units for Management of Bamboo Waste.

- Bamboo Processing units for Bamboo Bottles, Handicrafts and other bamboo products.

RUBBER

OPPORTUNITIES

- Tripura delivers cheap skill and unskilled labour.

- COVID-19 has opened up prospects of latex based manufacturing endeavours.

- There are tremendous scopes for extension of area & value addition.

- Local market size is increasing.

POSSIBILITIES

- Bangladesh corridor.

- Access to SE Asian market.

- Upcoming SEZ.

- Enhanced Central / State Govt. support.

AGRICULTURE

STRENGTH

- Large segment of farmers are very progressive and technology responsive.

- Meandering rivers and rivulets covering large part of cultivable area.

- High ground water level also used for irrigation purpose.

- Good production of local niche crops (Kalikasha, Harinarayan, Gobindabhog) for marketing outside the States.

OPPORTUNITIES

- Crop and livelihood diversification.

- Bringing more area under organic cultivation with value addition and marketing support.

- Agri-preneurship development.

- Creation of economic corridor with far south east.

HORTICULTURE

STRENGTH

- Total production may be increased by increasing productivity.
- More area may be brought under the cultivation of the crop as per demand
- Introduction of high yielding varieties and improved cultivation may also increase the volumes of production of raw materials, as per demand of the industry.

OPPORTUNITIES

- Jackfruit, Pineapple and Lime /Lemon are organic by default and has a wide market either in fresh or processed form.
- Marketable surplus increased due to cease in illegal trade with Bangladesh following border- fencing.
- Innovative crop like Dragon fruit and Tropical Apple started growing within the state.
- Good connectivity with the villages (producing areas).

FOOD PROCESSING

- Food Processing activities have been identified as "Thrust sector" by the State Government.

- Additional subsidies are being provided for food processing industries under Tripura State Incentive scheme.

- Processing units for Major Fruit Crops - Pineapple, Jackfruit, Orange, Litchi, Cashew, Coconut, Mango) and Major spices - Ginger, Turmeric, Chilli.

- Potential for rice milling sector with modern technology along with potential for Modern Flour Mill, Cashew Processing, Iodised Salt, Ice slabs/ Ice candy/ Ice cream, Soya Nuggets, Bakery, Biscuits manufacturing, Groundnut processing, Salted snacks, Cold Storages, etc.

- Opportunities of setting up units in Mega Food Park.

- Opportunities in setting up Integrated Cold chain and value chain infrastructure.

- Creation /Expansion of food processing & preservation capacities.

- Opportunities in setting up Infrastructure for agro-processing cluster.

- Creation of backward and forward linkages.

- Opportunities in setting up Food safety and quality assurance infrastructure.

TEA

STRENGTHS

- Tripura tea is very strong in flavour with considerably good aroma.

- Tripura tea logo has been developed for better marketability.

- Huge initiative taken by govt to encourage Tripura Tea.

- Tea sector is included in the thrust sector for investment in Tripura.

- Introduction of high yielding varieties and improved cultivation may also increase the) Tea.

OPPORTUNITIES

- Tripura Tea is now fetching good prices in Auction markets.
- Very less use of chemicals to enable Tripura Tea to be graded as organic.
- Introduction of Tripura Tea in PDS System has increased internal consumption.
- New age entrepreneurs and small tea growers are coming up for making speciality tea.

AGAR TREE

AGAR (AQUILARIA MALACCENSIS)

- Agar is found in abundance in North East India. As per preliminary estimate, about 5.4 million trees are available in Tripura.

- While average cost of Agar wood chips is about Rs. 1-2 lakh per kg, Agar oil (Liquid Gold) is almost Rs. 10-20 Lakhs per kg.

- Main markets are Middle East countries and to some extent in South East Asian countries.

- MoEF&CC is working for finalisation of quota for export of Agar wood products.

- Government will encourage the investors to invest in these Agar Business models within existing policy frameworks.

AGAR BASED BUSINESS MODELS :

- Agar contract Farming, Agar Inoculation Production Unit and inoculation of Agar Trees.

- Raising of private Agar plantation by taking land on lease basis from local land owners.

- Establishment of Agar oil/ chips processing unit, Quality Planting Material/,Agar Nursery/Tissue Culture based planting material development.

HANDLOOM

HANDLOOM

- High demand of handloom products in domestic and national markets.

- There is a good demand for traditional RISHA in all over the Country as well as in the State.

TECHNOLOGY

- Skilled Weavers.

- Weavers are willing to adopt modern techniques.

- Shifting to frame loom requires present basic knowledge.

- Scope for development of design & motifs.

DESIGN

- Weavers are having basic concept of design making.

- Traditional designs on traditional fabrics create high demand in local markets.

- Weavers are capable to produce traditional designs on loom manually.

SKILL

- 65 Handloom Clusters.

- Availability of traditional skilled weavers.

- Inherited skills among the weavers.

- Having good number of Loin loom weavers concentration.

- More skilled weavers could be trained.

- High demand of handloom products.

- Brand building for traditional fabrics and other products.

- Supply chain may be reformed strategically.

TECHNOLOGY

- Availability of skilled weavers.

- Once the productivity increases, it will reduce the wages.

- Adoption of Jacquard & Dobby Design Weaving.

DESIGN

- Possibilities of creating new products besides the traditional fabrics to explore the market.

- Ample scope for products diversification by developing through the traditional weavers.

- Diversified products will ensure better market value.

SKILL

- Loin looms weavers could easily be shifted to frame loom after proper trainings.

- Scope for improvement in working environment.
